CheckMyCCTV™
Maintenance Reinvented

Detect | Report | Resolve
CCTV system issues
BEFORE they become critical

Connection Issues	Camera Failures	Image Integrity	Hard Disk Failures	Recording Issues	Time & Date Inaccuracy

CheckMyCCTV ™ CLOUD is a hosted service which automatically checks the health of your remote CCTV systems every hour of every day - detecting and reporting faults as they happen, prompting action before those problems potentially become critical.

Benefits of using CheckMyCCTV ™ CLOUD services:

- **Low start-up cost.**
- **Pay as you Go monthly billing with no long term commitment.**
- **No Hardware Servers required**
- **Always-On Service - hosted at a secure North American ISO 27001 certified data centre**

After all, if your customer's CCTV isn't working, they don't have CCTV!

Contact-us to find out how you can enhance your service offerings and increase your revenues by offering 24/7 system checks to your customers today!
